### DELAYS IN CRIMINAL CASES.

The case of a man charged with murder, committed several months ago, was first called in Court in San Francisco Monday. Whereupon the defendant's attorney promptly applied for a continuance, not because of absence of witnesses or inability of the Court or its officers, but on the ground that on the day set for trial he had some other case in another Court which he could not afford to neglect. The supervision of a paroled prisoner cannot be in America what it is where they have a more efficient police. Our police is, for the most part, confined to cities and larger towns, while many criminals live or would find employment in rural districts, removed from police supervision. It has been suggested abroad that the task of supervision might be placed wholly or in part in the hands of prisoners' aid societies, but we have no such societies. At least they are few in number, and restricted in their activity. They could not, I think, undertake or successfully accomplish this word. But the employer of the prisoner—and a prisoner should never be paroled without employment first found for him—may be engaged to watch over him, and report to the authorities any apparent deviation from the path in which he should walk. Prison Director sichart, of Wuntemberg, has said that police surveillance is undesirable; that the paroled prisoner should not be subjected to unnecessary mortification; that what he requires is protection against any hinderance which may exist to his honorable success; and that in no event should surveillance of any description be continued longer than the circumstances of each case seem to require.

Unquestionably this is the correct view.

DELINQUENT INTEREST ON STATE LANDS. Suits in foreclosure, says the Surveyor-General, instituted because of the non-payment of the annual interest due on State lands, are extremely expensive legal proceedings; and long experience has demnstrated that such suits invariably result in loss rather than benefit to the interest of the State. If the lands are of value the deinquent interest is always paid, even though it often amounts to as much as the principal. On the other hand, when the lands revert to the State they are found to be of no value whatever, and the State suffers the loss of the expense of the suit in oreclosure. During the last eighteen years the Registers have sent out the delinquent lists only seven times, though required to

I concur with the expressed opinion of my predecessor, that the law should be changed so as not to require the issuance of to notify the officers of the Association o delinquent lists oftener than once in four years, or else fix a limit to the cost of foreat hand. These will be taken in hand and arranged by the Association and properly losure, so as not to absorb all the money eccived by the State. The law of 1863 fixed a limit to the amount payable in such our Agricultural Association show some life and enterprise, and compile and pub suits; but the costs now demanded are generally much greater than the amount

ollected by the State.

I also have the honor to report that it is my belief that all State lands, known to be timbered lands, should be withheld from sale entirely, and that a concurrent resolution should be adopted at the next session of our Legislature, requesting our delegates in Congress to endeavor to secure the pasage of a bill withdrawing from sale all unsold United States lands returned and known to be timber lands. I make this recommendation because of

the fact that the denuding of the mountain of water in the springs and watercourses along their sides, and rendering disastrous floods possible by the too sudden precipita tion of the winter rains into the differen STATE SCHOOL LANDS.

I would also recommend an examina-tion, by such methods as the Legislature tion, by such methods as the Legislature of especial or noteworthy importance may prescribe, of the remaining unsold regarding our county is published in an approximation of their true value, and the school fund thereby be increased by a much larger amount than it would be if the lands were sold at the present price of \$1 25 an acre.

FIVE HUNDRED THOUSAND-ACRE GRANT. I would also recommend the adoption of a concurrent resolution requesting our del-egates in Congress to use their best endeav ors before the Department of the Interior to secure the final settlement between the State and the United States of the 500,-000-acre grant, believing that there is still a palance due the State of California of some 10,000 acres.

### Nut-Growing. More and more attention is being di

Joaquin valley, and, in fact, all over the State of California.

Immense wheat ranches are gradually growing smaller, and alfalfa, vines, fruit and nut trees are appearing to diversify the landscape and add to the revenue of the people.

Among other productions of the rich soil of California, which have until within a short time been imported largely from foreign countries, are nuts of various kinds It has been proved beyond a doubt that al-most all varieties of nut-bearing trees grow luxuriantly and produce generously in Cal-ifornia—in the foothills as well as in the valleys, and from the northern to the south ern limits of the State.

In and around Stockton are to be found five or six varieties of almonds, such as the soft-shelled, the hard-shelled, the Languedoc, Sultana, Drake's seedling, etc. All are doing well, and the statements of those who have had years of experience in their culture show that these nuts will do as well in this section as in any part of the The trees bear in three years from the bud, and do not require unusual at-

There are also to be found many walnut trees, notably of the English, California black, Madeira, Mayette and one or two other varieties. In fact the walnut family thrives and bears well here, and greater atention is being paid to the culture of the walnut from year to year. There are also a great many chestnu

trees in this portion of the State, the Italian variety being the favorite. At the present time there are to be found in the largest and finest quality, grown in this vicinity. Other varieties, such as the Numbo, Marron Combale, etc., are to be

Peanuts produce largely in those sections where there is light, rich soil. In the garden of Judge Terry of this city is a pecan tree in full bearing.

The list might be extended, but enough has been said to show that owners of land would be wise to set out nut-bearing trees ornamental as well as profitable.—Stoc

### LOCAL INTELLIGENCE.

The Horse and Buggy Recovered. A week ago last Saturday R. H. Platt hired a horse and buggy at H. B. Carley's stable, and went out for enjoyment. He did not bring the property back, but on his return stated that his buggy had collided near Oak Knoll with a horse and cart, which he brought to Carley's stable, saying that the horse he had hired ran away after the collision. Subsequently a young man named Abe Duncan, a resident of Brighton, claimed the horse and cart, which he said and they had not been heard from, the owner swore to a complaint charging Platt with felony embezzlement, but the warrant was not served, the young man having disappeared. Yesterday the horse and buggy were returned to Mr. Carley, and it developed that they were found Saturday night or Sunday morning at the Manlove place, about a mile from Brighton, on the old Jackson road. The horse was all right, but a wheel of the buggy was damaged, as was also the harness. Mr. Manlove told his men to leave word at Brighton of the find-ing of the property, or send information to the city, but they failed to do so. The re-covery under such circumstances relieves Platt of the criminal charge against him, and it is presumed that he got on a spree, and the horse ran away.

The Explanation.

In yesterday's Record-Union it was mentioned that on the previous evening Colonel Sheehan found a bay mare and buggy on Twenty-first street, between S and T, the appearances indicating that the horse had been indulging in a runaway. Yesterday it was learned that while Deputy County Clerk Guth and his mother were returning from a ride into the country that evening, the horse, which was one Mr. Guth had hired, shied at something, and when the driver pulled her up one of the lines broke near the bit. The buggy almost immediately got cramped in such a manner that Mr. Guth was thrown out, but his morther sayed herself by eliming to the his mother saved herself by clinging to the dashboard. Subsequently she seized the other line, turned the horse into a fence near by and stopped her. The lady alighted unhurt, but the mare ran away before she could be secured. Mr. Guth was severely bruised by the fall and rendered insensible. Yesterday he was confined to his room, very sore from his bruises, and nursing a sprained ankle and black eye, but thankful that the accident did not cause suffering to his mother as well as himself.

Clunie Opera House.

Commencing this evening, and continuing through the week, Osbourne & Stock\_ well's Company will produce the favorite drama of "Uncle Tom's Cabin," at the Clunie, with fine scenery, picturesque effects, and all the accessories, including the Magnolia Jubilee Singers, Siberian bloodhounds, trained donkeys, etc. The apothe osis at the conclusion of the drama, "Beautiful Gates Ajar," is in five beautiful changes. The company includes L. R. IMMIGRATION MATTERS. The Excursionists from the East-How to

port from Dr. Latham was received and read:

SACRAMENTO, Cal., Nov. 23, 1886.

William Ingram, Jr., Esq., Secretary Northern and Central California Immigration Association—Sire: I have the honor to transmit herewith a statement in detail of the work of this office since your last meeting.

I have only to say in addition that still further railway companies to the East are taking an interest in the work of inducing travel and emigration from their respective localities to this State. These companies are all using descriptions of this part of this State in inducing this travel. I am in receipt of information that some of these companies are distributing as high as 40,000 copies each month. From these efforts the travel here is now larger than ever before, and it is constantly increasing. It is thought by the Passenger Agents that 35,000 people will come to this State in the unit of the Union Pacific, the Denver and Rio

State in the next three months.

The Union Pacific, the Denver and Rio Grande, and the Central Pacific lines, run-

claimed the horse and cart, which he said some one took from in front of the Five-mile House, near Brighton, Saturday evening, and he was satisfied that it was Platt who appropriated the property. Platt could not explain what became of the horse and buggy belonging to Mr. Carley, and, after two or three days had passed, and the Central Pacific lines, running to this city, are now doing much more of this transportation than they have done for years. I have information of two large excursions now en route here, These are both Pullman-car parties, and are made up of people of means, who will visit the country with a view of buying land for

In this connection I would urge upon the real estate men the necessity of their making some effective effort to place descriptions of their lands for sale before these people prior to their arrival at this point. If they once know the cheapness and capa-bilities of our lands they will come back here, even if they do not stop here en route. The excursion agents in charge of these parties have every facility to influence their location, and if they could be interested in aiding to locate in this vicinity these home-seekers, we should get many more of them, directly and indirectly, than we now do.

The class of immigrants now coming to this State is much better than heretofore. They are, as a rule, looking for higher-priced and better land, and have the money to pay for it, but they want it for fruit-growing and in small quantities, and I find growing and in small quantities, and I find considerable difficulty in directing them to such lands. The great need is for some large tract of land, divided into twenty and forty-acre lots, watered, and near a railroad. I know that such lands, at reasonable prices, would find ready sale. There is an abundance of such land here, but the enterprise and foresight to put it in proper shape seems to be lacking. I have made several efforts to that end, but have not, so far, met with success. I would urge upon far, met with success. I would urge upon you the necessity of some decided effort in

While I am writing this there is a Pullman excursion train from the East at your depot of nearly 400 people. A large part of those coming in these excursions can, by properly directed effort, be induced to investigate the claims of this section, and I am sure the result would be their location

in this part of the State. H. LATHAM.

stood that he has no "scheme" on foot for the purchase of additional water works a resolution requesting him to visit the Holly Pump Works, and ascertain the cost of additional pumps to work with and re-inforce the present gang of Holly pumps now in use by the city, in connection with the Stevens pump, constructed at the rail-road shops in this city. Accordingly, Mr. Jones visited the Holly Works. He there ascertained that no Holly pumps have been made for seven years. He found that the firm was making the Gaskell pump, which is claimed to be much superior. He was refreed a new gang (four) of 15t inch. now in use by the city, in connection with was offered a new gang (four) of 151-inch Holly pumps for \$30,000, guaranteed to draft and deliver 6,000,000 gallons of water per diem. The Gaskell gang was offered at \$24,000, guaranteed to draft and deliver 8,000,000. It was also represented to him that the latter gang would save two-fifths of the fuel used by the old Holly pumps, and which economy, Mr. Jones says, would pay for the pumps in three years' time. This saving is effected by the placing of the pumps one above the other, so that no branching steam-fed pipes in open air are used, and by which there is loss of finel by the conductation of steam. fuel by the condensation of steam. Mr. well-balanced and strong company, and long explains that the need for reinforce-Jones explains that the need for reinforcement of the present pumps arises out of the fact of the extension of the mains and increase of water-takers, to say nothing of the augmented waste and the liberality with hey and Frank Johnson.

The Republican and Democratic City Central Committees are looking about for available candidates, and will doubtless meet before many days to formally conand good, and that though they have been ished more than once, it does not affect the original metal as to quantity or strength. When he returned from the East, he made estimates as to the probable ost of additional ground, and that ascer ained, he then reported the cost of rein-orcing pumps. This is how Mr. Jones ex-lains the matter, and he is entitled to the all benefit of the statement, and of his dis aimer of having any scheme on foot or in

Early Training.

AEW YORK, November 23d.—In the Mail and Express' sporting column is the following: In the season just gone by five of our two-year-olds won more than \$100,000. In the same period 200 of our two-year-olds won less than \$200,000; still these very same youngsters had great promise as yearlings, and much was expected of them. The repeated failure of so many well-bred youngsters raises the question whether it is wise to have so much two-year-old racing. The two-year-old stakes are so many and such that dozens of promising youngsters are ruined in the varied and hurried attempts to get them into condition for the trying contests, while many yearlings are Early Training. contests, while many yearlings are ned in health and spoiled in temper by | 12 depended in health and sponed in temper by especial trials. Early in their two-year-ld form they are trained down to the inest point for spring stakes. Some of hem stand the preparation, some break lown absolutely, and others lose strength and flesh and are thrown out of training. The death of the great colt, King Fox, was caused by over-preparation. The severe test he was put to in order to win the Great Eastern handicap killed him. Had he been spared, it is likely he would have

WHEAT—Business is fair of movement, while values are steady, with moderately strong tendency. There is quick demand for shipping of No. 1 grade at \$1 40 \$2\$ ctl. while better qualities sell quite as readily at \$1 41\frac{14}{20}\$ dtl. CALL BOARD SALES-MORNING SESSION.

Buyer season—400 tons, \$1 47; 1,200, \$1 4634; 0, \$1 4678. Buyer 1886—100 tons, \$1 415/7 ctl. AFTERNOON SESSION.

BARLEY—Trade in feed is not of extensive character, though in filling their wants buyers find that values are rather firm. There are few holders of really choice lots of feed that are inclined to sell below \$1 07%, though occasionally a parcel of good quality is picked up at \$1 05 \( \frac{2}{2} \) ctl. Poor and dark coast lots are to be had at \$100 102% \( \frac{2}{2} \) ctl. In Brewing there is no movement just at present. Holders of the better quality ask \$1 17\( \frac{2}{2} \) 20, and a buyer would probably have to pay somewhere within this range if he wanted product. Still, if sales were forced, it is doubtful if a consumer could be found at over \$1 15. The latter figure is about the limit of local brewers. The hope that there will be further demand on export account, perhaps, gives the market more strength than anything else. Second quality of brewing is quotable at \$1 12\( \frac{2}{2} \) etl.

CORN—There is little of interest to note in this article. Trade is quiet, while prices are kept easy by the prospect of further imports from Nebraska. We quote: California large, Yellow, \$1 05@1 10; small Yellow, \$1 02½@1 07½; White, \$1 10@1 15; ctl. Nebraska is quotable at \$1@1 02½ for mixed and \$1 05@1 10 for straight Yellow; White, \$1 10@1 15 pctl.

SEEDS—There is not much activity in the seed line. Some little inquiry is noted for Alfalfa, and arrivals from Utah are said to be finding custom at about our inside quotation. Domestic Alfalfa is firmly held, though there is no trading to speak of. Mustard is easy in tone, and buyers of round lots could probably secure some little shading on quoted prices.
